## REMARKS

The application has been carefully reviewed in light of the Office Action dated December 12, 2006. This communication is believed to be a full and complete response to that Office Action. Claims 1-20 were pending in the application prior to entry of the present amendments. By the present Office Action, claims 1-20 have been rejected.

By present amendment, claims 1-20 have been canceled and claims 21-38 have been added. No new subject matter has been added.

Applicant reserves the right to pursue all original claims in this or other patent applications. Reconsideration and reexamination of the present application is respectfully requested in light of the foregoing amendments and in view of the following remarks, which establish that the pending claims are directed to allowable subject matter. Applicant respectfully submits that all pending claims are in condition for allowance.

## I. CLAIM REJECTIONS

Under 35 U.S.C. § 101

The Office Action rejects claims 11-18 under 35 U.S.C. § 101 as being directed to non-statutory subject matter. Claims 11-18 have been canceled, rendering the rejections thereto moot.

Under 35 U.S.C. § 112

The Office Action rejects claim 19 under 35 U.S.C. § 112, first paragraph as failing to comply with the enablement requirement. The Office Action states the claim contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention as claimed. Claim 19 has been canceled, rendering the rejection thereto moot.

## Under 35 U.S.C. § 102

The Office Action rejects claims 1-20 under 35 U.S.C. §102(b) as being anticipated by Digital cellular telecommunications system (Phase 2+) (GSM); Universal Mobile Telecommunications System (UMTS); USIM Application Toolkit (USAT); (3GPP ts 31.111 version 4.4.0 Release 4), European Telecommunications Standards Institute 2001 (hereinafter ETSUSIM). Claims 1-20 have been canceled, rendering the rejections thereto moot.

## II. NEW CLAIMS

Claims 21-38 have been added, and find full support in the specification as filed. Specifically, support for claims 21-38 can be found throughout the specification which refers to preventing a user from clearing text on a display prior to a specified elapsed time. *See e.g.*, ¶¶ 7, 16 and 19. New claims 22-26 depend from new independent claim 21, new claims 28-32 depend from new independent claim 27, and new claims 34-38 depend from new independent claim 33.

Applicants respectfully submit that new claims 21-38 are directed towards subject matter that is not disclosed or taught by *ETSUSIM*. *ETSUSIM* fails to teach or suggest at least the limitation of specifying a duration in a SIM application for which text is to be displayed *prior to permitting a user to clear said text*. Instead, *ETSUSIM* discloses displaying a message for a specified duration. *ETSUSIM* also discloses displaying the message until a user clears the message. However, *ETSUSIM* fails to disclose the specified duration being associated with the duration the message will be displayed *prior to permitting a user to clear the message*. Accordingly, the Applicants submit that new claims 21-38 are directed to allowable subject matter.
